Electronic Discovery: Making Technology Work for Every Case

CIVIL LITIGATION TRACK AND TECHNOLOGY TRACK

This seminar will provide an overview of the current state and federal rules along with a discussion regarding staffing and technology solutions available to New Jersey practitioners. E-Discovery is no longer a one-size fits all proposition. During the seminar, attendees will be taken through a typical e-discovery project and learn how the proper application of people, processes and technology can enable lawyers to use electronic discovery in all courts for the benefit of their client and their case. Using simple techniques and asking the right questions can help every practitioner navigate the world of electronic discovery. This seminar will give attendees the perspectives of e-discovery practitioners, technical personnel, and the judiciary to provide a holistic view of how to use electronic discovery in everyday cases.
